City of Beaufort Department of Planning and Development Services

M E M O R A N D U M

TO: Scott Dadson, City Manager
FROM: Libby Anderson, Planning Director
DATE: January 12, 2011
SUBJECT: Bay Street Street Lighting

=====

As you are aware, two mast arm traffic signals are scheduled to be installed at the Bay/Carteret Street intersection this month. These mast arms will replace the poles that currently hold the pedestrian push-button controllers (see attached photos). Since the poles will be removed, the push-buttons need to be relocated. The push-buttons cannot be installed on the new mast arms, and SCE&G will not allow the push-buttons to be relocated on the "goose-neck" lights. As a result, staff is recommending that the three goose-neck lights at this intersection be replaced with the new City fixture that is in place on Bladen Street and at the Municipal Complex. Replacement of these street lights is included in the approved CIP budget. In an effort to balance the lighting at this intersection, staff will also be investigating installing a fourth light at the northeast corner of the intersection in front of the Tupper, Grimsley & Dean law office where one currently does not exist.

During last spring's parking review, there was considerable discussion regarding the adequacy of downtown street lighting. Staff will be forwarding a proposal in the near future, to replace the remainder of the goose-neck lights on Bay Street with the new City fixtures.

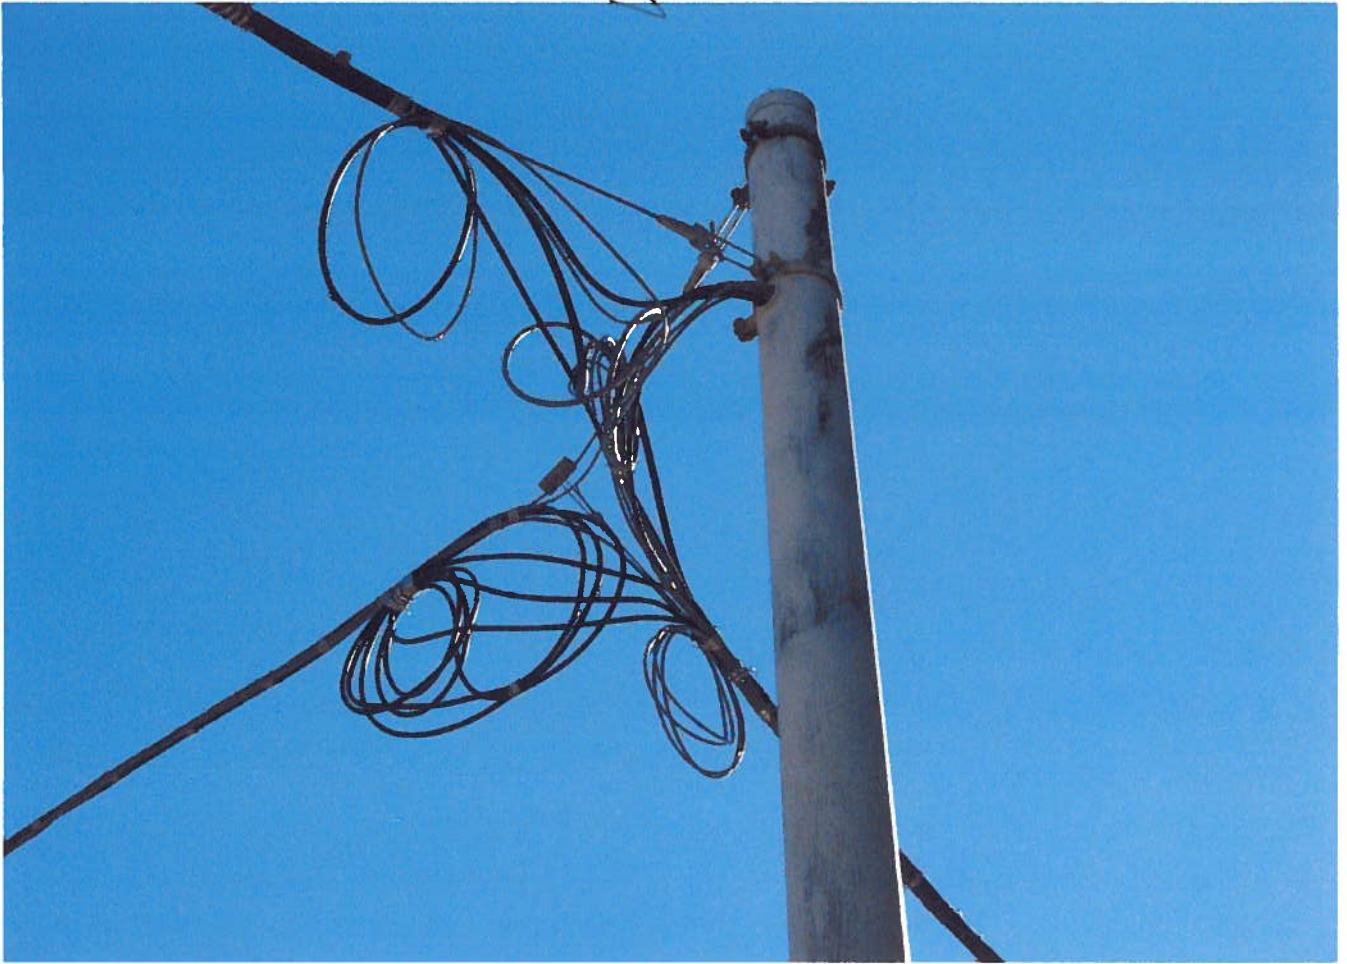

Please contact me with any questions.

Thank you.
